PROFESSIONAL SUMMARY

Full Stack Developer with 9+ months of experience building scalable, production-ready web applications using **Next.js, React, Node.js, and PostgreSQL**. Specialized in backend systems, real-time architectures, and AI-integrated applications. Proven ability to design secure, high-performance systems with caching, queues, and modern DevOps practices.

SKILLS

Programming Languages: C, Python, JavaScript, Java (Basic), PHP

Frontend - HTML5, CSS3, React.js, Next.js, Tailwind CSS

Backend: PHP, Nodejs, Apache Kafka

Databases: MySQL, MongoDB, PostgreSQL, Firebase, Prisma,

Tools & DevOps: Docker, Vercel, Render, Git, BitBucket, GitHub actions

Other: Caching (Redis), Queue System (BullMQ), Real-time (Socket.IO),

Storage (Cloudinary), Validation (Zod), Kaggle, Ollama, WebSocket, TanStack

Query, Next AUTH, RBAC, Custom logging, Audit logs, API Rate Limiting

Currently Learning: Learning AWS (EC2, S3), CI/CD pipelines, and container orchestration with Kubernetes

Experience

Full Stack Web Development – [Electrosoft System, Pune](#)

July 2025 – Ongoing

- Developed and deployed full-stack features using React, Node.js, Express, and PostgreSQL, improving user workflows and system reliability
- Designed and integrated REST APIs, reducing response latency and improving frontend-backend communication
- Optimized frontend performance (lazy loading, API optimization), improving page load speed by 20%
- Implemented responsive, cross-browser compatible UI components used across multiple modules
- Collaborated with backend engineers to build scalable and maintainable system architecture

Project work on:

- getyourprojectdone: [Premium Engineering Project Solutions](#),
- scaips.in: [Create High Level Portfolio](#)

PROBLEMS/PROJECTS

PeriodCareForYou – AI-Powered Menstrual Health Platform ([Visit website](#))

Nov 2025 – Ongoing

Next.js, React, LLM (Gemini, Ollama), PostgreSQL

- Built an AI-driven health platform providing personalized menstrual insights in 3 languages (Hindi, Marathi, English)
- Developed chatbot and symptom analysis system using LLM integration
- Designed scalable frontend architecture with focus on accessibility and user engagement
- Implemented modules for cycle tracking, prediction, and educational content delivery, real time notification to partner.

Avsarmarg - Your Journey from Campus to Company ([Visit Website](#))

March 2025 - Ongoing

Next.js, Node.js, PostgreSQL, Firebase, Redis, AI API

- Developed an AI-powered career coaching platform integrating concepts like Ikigai and Indian learning methods to offer personalized career paths, interactive learning, resume analysis, and interview preparation tools.

- Enhanced employability by streamlining skill development, gamified learning, job readiness, and recruitment processes for students, colleges, and companies through a unified job/hiring portal.
- Implemented Redis caching to reduce API response time by 40%
- Designed RBAC system for role-based access across admin/user modules
- Used BullMQ for async job processing in notification system

Product Management System (PMS)

Node.js, PostgreSQL, Redis, Socket.IO,

- Designed scalable backend system with real-time updates using **WebSockets**
 - Implemented **Redis caching** to reduce API response time and improve performance
 - Built modular architecture supporting multiple users and concurrent operations
-

Another Notable Project

- 1) [BodhaBot](#):- AI-powered solution that transforms your website, JSON data, or PDF documents into intelligent conversations.
 - 2) [Codeeditor](#):- Fully-featured Online Code Editor built with Next.js App Router, Monaco Editor, and Judge0 API!
 - 3) [Filexerox](#):- Revolutionary cloud printing that connects you to thousands of Xerox centers. No USB drives. No waiting.
 - 4) [easy-mailer](#):- A simple and powerful email SDK for Node.js with bulk sending, templates, and multi-provider support.
 - 5) [C-RUSH](#):- The Ultimate C Programming Challenge by GCOEY Team. Solve mind-bending problems and prove your coding prowess!
 - 6) PMS: -Designed and implemented a scalable product management system with real-time updates and caching.
-

EDUCATION

1. B. Tech in Computer Engineering

Government college of engineering Yavatmal

2022-2025

2. Diploma in Computer Science & Engineering

Gramin Technical and Management Campus Nanded (with Percentage 82.17)

2019-2022

ACHIEVEMENTS

- Winner Hackathon – Codesphere (Jalgaon), Hacksphere (Nagpur), Brahmax 1.0(Jabalpur), Prabal (Kolhapur), ...
 - Winner Project/Startup Expo – Technovation (SSGMCE), Innovanza'25 (Nagpur), Ennovate's25 (Nagpur), Build Solo (SSGMCE), ...
 - 9× Project Expo Winner, 5× Hackathon Champion for more [CLICK HERE](#)
-

Leadership Excellence

- I proudly lead Team GCOEY— the premier team representing Government College of Engineering, Yavatmal. Our mission is to cultivate algorithmic thinking and foster innovation through collaborative problem-solving.
- Our flagship photos, C-Rush 1.0, 2.0 & 3.0, has become a cornerstone for nurturing young talent and building a thriving culture of competitive programming on campus for more [CLICK HERE](#)
